

Fleas in DOGS

Petplan®

50%

of fleas in the home exist in egg form

Adult fleas can lay up to

40

eggs per year

95%

of flea eggs, larvae and pupae are found not on your pet, but elsewhere in the home

Flea eggs can survive dormant for up to

18 months

In average household conditions, a flea's life cycle lasts

3-6 weeks

...which is why fleas can keep appearing even after treatment!

Where do dogs get fleas from?

Other animals in the home

Other animals outside the home

The world around them
